

Click2Form 2018.1

Release Notes

Click2Form 2018.1

What's new and changed in **Click2Form**® version 2018.1.

New Default Custom Element Size Option

The Analysis Preferences include an option for entering a default element size for mesh elements.

New Materials in the System Material Library

New materials from European and Japanese standards are added to the system material library.

Measure Tool Enabled During Post Processing

The Measure tool is available for measuring the flattened blank during the post processing of a blank fit or blank nesting analysis.

Resolved Issues

The IGES file reader has been updated to eliminate vertices created upon import.
